EDUCATION

Lovely Professional University
Bachelor of Technology in Computer Science

Phagwara, PB
Sept. 2022 – Present

Anees School
Senior Secondary Education

Mohali, PB
April 2019 – March 2022

PROJECTS

- StrixSense** | *Rust, Linux, Multi-threading* May 2025
- Engineered a high-performance, multi-threaded service in Rust to transform a static RGB keyboard into a dynamic, ambient notification system for events like WiFi and Bluetooth status changes
 - Orchestrated system CLI tools to monitor status by parsing real-time output streams for specific events
 - Implemented a robust, command-driven hardware abstraction approach for reliable keyboard control
- Goodness Grader** | *TensorFlow, Keras, scikit-learn, Pandas, OpenCV, Flask* April 2025
- Built a CNN model achieving 95% accuracy in classifying fruit quality (Good, Bad, Mixed)
 - Benchmarked performance against a Random Forest baseline (87% accuracy, 17% recall on “Mixed”)
 - Deployed model using Flask for real-time image-based predictions
 - Integrated Celery and Redis to manage asynchronous image preprocessing tasks
- TypoTamer** | *Python, NLTK, HMM, N-Gram* Oct 2024 – Nov 2024
- Implemented an autocomplete and spellchecking system using statistical language models
 - Utilized Hidden Markov Models and the Viterbi algorithm for context-aware typo correction
 - Trained on Treebank and Reuters corpora to improve language modeling and accuracy
- ProdCluster** | *Python, K-Means, TF-IDF, Jupyter* August 2024
- Applied K-Means clustering to group 125K+ product descriptions into meaningful clusters
 - Used TF-IDF vectorization for semantic similarity in product recommendation
 - Designed a simple recommender interface to enhance search and discovery
- LawAware** | *Gemini API, React, Python, BeautifulSoup, Requests* September 2024
- Created a legal awareness platform with real-time news scraping and violation detection
 - Integrated Gemini API for context-aware analysis of legal breaches in news articles
 - Built an AI-powered chatbot and user-friendly frontend for interactive legal guidance

EXPERIENCE

- Project Contributor, IEEE Summer of Code** July 2025 – Aug 2025
Remote
- Dify (Open Source)*
- Contributed to the Dify open-source project by building a new Python plugin, WipeoutTool, to automatically remove image backgrounds
 - Implemented support for multiple file formats (JPEG, PNG, WebP, BMP) with a standardized PNG output
 - Ensured robust performance by incorporating error handling and validation for diverse use cases
 - Gained hands-on experience in open-source collaboration, plugin development, and version control

CERTIFICATIONS

Microsoft Certified: Azure Data Scientist Associate (DP-100) June 2025 – June 2026

TECHNICAL SKILLS

Languages: C++, Java, Python, SQL (MySQL, Oracle), Rust
Frameworks: React, Angular, Spring Boot
Machine Learning: scikit-learn, TensorFlow, Keras, pandas, NumPy, Matplotlib, Seaborn, OpenCV, NLTK
NLP: TF-IDF, Word2Vec, BERT, N-Gram Models, Hidden Markov Models (HMM)
Tools/Platforms: Git/GitHub, VS Code, IntelliJ, PyCharm, Jupyter Notebook, Google Colab, Maven, Dev C++
Soft Skills: Adaptability, Time Management, Critical Thinking, Leadership, Teamwork, Attention to Detail
